FROM CONCEPT TO
COMMERCIALIZATION

**INNOVATION
YOU CAN TRUST**

Founded in 2010 in Bengaluru, Stabicon Life Sciences Pvt. Ltd. is a full-service partner for pharmaceutical, nutraceutical, cosmeceutical, and consumer healthcare industries.

We provide end-to-end solutions across formulation development, analytical R&D, stability and microbiological testing, and seamless technology transfer — all governed by cGMP-compliant quality systems.

With a strong IP-driven approach, regulatory expertise, and strategic alliances with global GMP-approved CMOs, we deliver innovative products to regulated markets including North America and the EU.

Concept-to-Commercialization Support

Innovation, formulation, IP strategy, dossier preparation, and scale-up: all under one roof.

Proven R&D Strength

Vertically integrated teams specializing in novel drug delivery and bioavailability platforms.

Regulatory & Market Expertise

Accelerated approvals and dossiers tailored for global market entry.

Global Standards, Local Efficiencies

International quality at cost-effective India-based operations.

ABOUT US

C3 CURA™ AUGMENTED ABSORPTION TECHNOLOGY

Turning Turmeric into Therapeutics

Curcumin, the bioactive from turmeric, is renowned for its health benefits but suffers from poor water solubility (0.6 µg/ml) and low bioavailability. Conventional curcumin formulations require very high doses, limiting efficacy.

Stabicon's C3 Cura™ Augmented Absorption Technology revolutionizes this challenge by:

- Enhancing curcumin's solubility and stability in water.
- Achieving up to 500x higher bioavailability, delivering the full benefit of turmeric.
- Reducing dosage needs by up to 1/100th compared to conventional curcumin.

The result is faster onset, sustained activity, and improved patient compliance — making it a gold standard in curcumin delivery.

VESIFUZE™ EMULGEL TECHNOLOGY

Next-Gen Topical Delivery

Traditional topical formulations often struggle with skin permeability, leading to limited efficacy in managing pain and inflammation. Stabicon's VesiFuze™ Emulgel Technology combines the benefits of emulsion and gel systems to create a highly permeable, patient-friendly delivery form. Key advantages include:

- Enhanced skin penetration of actives for deeper relief.
- Targeted action in osteoarthritis, rheumatoid arthritis, and musculoskeletal conditions.
- Non-greasy, smooth texture for greater patient comfort and adherence.

This technology represents a new revolution in topical therapy, bridging science and patient convenience.

OUR INNOVATION PLATFORMS

EN-INFI™ NANOTECHNOLOGY

Infinite Nanoparticles, Infinite Possibilities

Fat-soluble vitamins like Vitamin D3 face absorption barriers due to poor solubility. Stabicon's patented En-Infi™ Nanotechnology overcomes this with a unique process that produces uniform, ultra-fine nanoparticles of Vitamin D3 and curcuminoids, which:

- Delivers clear, stable, and uniformly dispersed oral solutions.
- Ensures rapid and sustained permeation into the bloodstream.
- Improves therapeutic consistency and bioavailability.

This makes En-Infi™ a game-changer in oral nano-solutions, setting new standards for efficacy in nutraceuticals and pharmaceuticals alike.

ORAMELT™ RAPID MOUTH MELT GRANULES

Fast, Convenient, and Patient-Centric

For pediatric and geriatric patients, swallowing tablets can be a challenge. Oramelt™ addresses this need with taste-masked, ultra-fine granules that dissolve instantly in the mouth. Benefits include:

- Rapid disintegration within 10–15 seconds: no water required.
- Safe and convenient: eliminates choking risk, perfect for on-the-go use.
- Pleasant mouthfeel and customizable flavors to improve adherence.
- Targeted for vulnerable populations: children, elderly, and patients with swallowing difficulties.

Oramelt™ sets a new standard for next-generation oral delivery, making medicines more accessible, safe, and enjoyable.

—
OUR INNOVATION PLATFORMS

At Stabicon, our strength lies in the seamless integration of science, innovation, and execution. We bring together a comprehensive product portfolio, deep R&D expertise, and proprietary delivery technologies to address complex healthcare challenges.

As a true one-stop partner, we support our clients across the entire value chain — from early formulation and regulatory dossiers to global commercialization — ensuring products that are not only effective but also trusted and patient-friendly.

Comprehensive Portfolio

Nutraceuticals, OTC, and natural products.

R&D Excellence

Dedicated in-house formulation and analytical development.

Innovation First

Proprietary technologies for superior efficacy and patient compliance.

One-Stop Partner

From formulation to dossiers, regulatory, and global commercialization.

OUR STRENGTHS

PRODUCT PORTFOLIO

Segment	Pill / Capsule	Gel / Cream	Patch	Mouth Melts / Effervescent	Suspension / Drops
Pain & Inflammation	X-Low Back Tablet Curcumin, PEA for Lower Back Pain	C3 Flex™ Emulgel Curcumin, Boswellia Serrata, Menthol, Oil of Wintergreen for Sprains, Arthritis	C3 Flex™ Patch Curcumin, Boswellia, , Menthol, Oil of Wintergreen for Musculoskeletal Disorders		
	Curcumin Softgel 95% Curcuminoids for Osteoarthritis & RA	C3 Flex™ Max Emulgel Curcumin, Boswellia Serrata, Menthol, Oil of Wintergreen, Capsaicin for Arthritis			
	C3 Flex™ Tablet Curcumin, Boswellia, Ginger for Arthritis	C3 Flex™ Roll-on Curcumin, Boswellia Serrata, Capsicum, Menthol, Oil of Wintergreen for Localized Relief			
Neurology	C3-Neuro™ Curcumin for Cognitive Health				Migmag™ Suspension Magnesium, Vit B6 for Migraine, Vertigo, Vestibular Disorders
	Nu-Cog Tablet Neuravena® Green Oat Extract for Cognition				
Women's Health	Endometrix Tablet Curcumin, NAC, Boswellia Serrata for Endometriosis	Chamomile Vaginal Gel Comfort in Postmenopausal Conditions			PaMS™ Suspension PMS & Dysmenorrhea Management
	Prosaff Tablet Saffron, C3 Cura Curcumin, Selenium, Vitamin D3 for Postpartum Depression			PCO-X Sachet Curcumin, Myo-inositol, Vit D3 for PCOS	TATDAY™ Magnesium and Vitamin B6 for Cramp Management
Bone & Muscle Health	N-Dexa Tablet Calcium, Curcumin, Magnesium, Vit D3 for Osteoporosis				
	SarcopX Tablet Curcumin, Ashwagandha, Vit D3 for Sarcopenia				

PRODUCT PORTFOLIO

Segment	Pill / Capsule	Gel / Cream	Patch	Mouth Melts / Effervescent	Suspension / Drops
Specialized Care	Stabicon Go-Less Capsules Pumpkin Seed and Soy Germ extract for Urinary Incontinence.	C3-Sornil™ Cream Curcumin + Boswellia for Psoriasis		Party Pal™ L-Arginine, Taurine, Vitamins C & B12, Curcuminoids for Hangover Relief	
	Liva Boost™ Tablet Curcumin + Silymarin + NAC for liver health & NASH	C3-Diagard™ Cream Curcumin for Diabetic Foot Care			
		C3-Diagard™ Collagen Gel Curcumin + Collagen for Diabetic Foot Ulcers			
General Wellness				Vit D3 Mouth Melt 400 IU-60000 IU, Sugar-Free, Fast Dosing	Novel Nano Vitamin D3 Solution Nano-formulated Vit D3 with C3 Cura™ Curcumin
					Yellow Root Curcumin Supplement (D3, A, B12) Immunity & Metabolic Wellness
					C3-Force™ Drops Immune & Metabolic Support
Oral & Respiratory Health		Curcumin Tooth Gel Oral Hygiene & Precancerous Lesions		Ezyswas™ Mouth Melt Respiratory Immunity	Curcumin Mouthwash Gum Diseases, Halitosis
		Curcumin Oral Gel OSMF, Lichen Planus, Leukoplakia		Ezyswas™ Effervescent Respiratory Health & Lung Rejuvenation	

Formulation Research & Development	Analytical Research & Development
Our development expertise is in NUTRACEUTICALS & NATURAL products catering to global market: • Oral solids ◦ Tablets-Immediate / Sustained / Delayed / Controlled Release ◦ Capsules-(Veg/Gelatin) Powders, Granules, Pellets, tablets in capsule, capsule in capsule, tablet & powder in capsules ◦ Powders- Mouth Melting / ODT, powder for suspension Pellets • Topicals • Liquid Orals • Nano Technology Products	• Method development and Validation • Analytical method transfers • Method verifications • Degradation analysis • Cleaning validations
Quality Control testing	Stability Studies
• Analytical testing (HPLC, GC, UPLC) • Wet lab testing • Stability studies • Dissolution tests • Microbiology • Microbial limit test • Preservative efficacy test • Antibiotic assay • Bacterial endotoxin test • Environmental monitoring • Water analysis	Storage Capacity • 1,38,000 Liters • 8 Walk in / 2 Reach in Special stability studies • Photo Stability Study • Thermal Cycling Study • In-Use Stability • Freeze Thaw Stability • Customized special Study Stability chambers are qualified as per ICH conditions Global market support Formulation Types • Solid, Semisolid, Liquid and Topical
Advanced Analytical Capabilities*	Manufacturing
• Extractable & Leachable • Nitrosamine impurities / TSNA • Chemical Characterization • Elemental Impurity Studies • Genotoxic Impurities Evaluations • Residual Analysis for Medical Devices	Manufacturing of: • Health Supplements • Natural Products • Drug Products

*in collaboration with partner lab
